Abstract (en)
The invention relates to a method of using a print system comprising a print engine for printing a receiving material and a holder for holding said receiving material and delivering said material for printing to the print engine, the method comprising receiving jobs by the system, a job being an order comprising printing information with the print engine on a type of receiving material specified in said order, placing the jobs in a print queue in a sequence of finishing, establishing one or more types of receiving material required to finish a set of jobs in the print queue, displaying, via a display unit, a list comprising said one or more types of receiving material, and selection, by an operator of the system, of a type of receiving material from said list, and the insertion of said type of receiving material in the holder by the operator of the system. <IMAGE>
