Abstract (en)  
[origin: WO03068006A1] The present invention provides a granulated, free flowing, comestible salt product comprising at least 96% wt. sodium chloride of primary particle size of less than 200 microns, up to 0.6% wt. of calcium and/or magnesium ions present as the chlorides and/or sulphates thereof, up to 6% wt. moisture, at least 30 ppm iodine present as an iodine containing salt and optionally other edible salts, vitamins, minerals and flavouring agents. A process for making the salt product is also provided. The salts of the invention have a good salty taste, a beneficial concentration of iodine and good flow properties. The invention also provides salt compositions comprising the salt product and at least one additional salt.
