Abstract (en)  
[origin: WO03069735A2] The aim of the invention is to enable, particularly in motor vehicles, a simple connection of a conventional electrical unit (4) to the conductor tracks (12) of a vehicle electric system in which the conductor tracks (12) are directly applied to a support (2), for example, by flame spraying. To this end, a connection adapter (18) is provided that is placed, via a partial piece (18A), between the support (2), which is fitted with the conductor tracks (12), and the electrical unit (4) to be connected. Inside the connection adapter (18), the conductor tracks (12, 22) lead to a conventional electrical connection (6) of the unit (4).
