Abstract (en)
[origin: EP1475030A2] A rack of dishwasher machine is described comprising at least one vertical wall (30) provided with at least one first (22) and one second (23) rod and a bottom plane (40), at least one dish holder shelf (1) means for the connection (10) of the shelf (1) with the wall (30) and suitable to determine a rest position (A) of said shelf (1) in which this is adjacent to the wall (30) of the rack (31) and a working position (B) of the shelf (1) in which this is arranged in such a way as to form an angle (Q) smaller than a right angle with the bottom plane (40). The connection means (10) comprise at least one first means (20) coupled to the vertical wall (30) and provided with a vertical cavity elongated as a slot (23), a pin (24) integral with the shelf (1) and in sliding engagement with said slot shaped cavity (23), a first lock (28) integral with said shelf (1) and suitable to engage with said first means (20) in order to determine said working position (B).
