Abstract (en)

[origin: EP1475240A2] Production of multi-page printed products comprises delivering to a main conveying device pages (I-III) printed in different printing processes in a freely selected order according to different delivery stations (18, 20, 22) in the conveying direction. The pages are folded one after the other and then collated. An independent claim is also included for a device used in the production of multi-page printed products. Preferred Features: At least one set of pages is produced in an offset process and at least one set in a digital printing process.
