Abstract (en)
[origin: EP1475315A1] An applicator (10) for a liquid product package comprising a container (20) with a free rim (23) to define an opening, which is covered by a sealing closure (40) with a clip or screw lock, where the applicator nozzle (30) is attached to the container, and has an opener (38) to pierce the closure and free the flow path from the container, is new. An applicator (10), for a liquid product package comprises a container (20) with a free rim (23) to define an opening, which is covered by a sealing closure (40) with a clip or screw lock, where the applicator nozzle (30) is attached to the container, and is fitted with a distribution opening (36) as a flow path from the interior of the container to the application surface, the nozzle has an opener (38) to pierce the closure and free the flow path from the container and the applicator nozzle has a screw thread (32) to fit on to the container.
