Abstract (en)

[origin: EP1475328A1] The depositing device for cut flat products, and especially sheets of paper cut by a guillotine has a suction brake table (7) for the braking of a fed sheet, and a stacking device (19) connected to the suction brake table. At least two rotating brake plates (8) lie upon the suction brake table and have their top surface parallel or generally parallel to the surface of the suction brake table. The brake plates have a number of suction holes, and the suction brake table has below each brake plate at least one suction hole in circle sector form for the drawing in of air.
