Abstract (en)  
[origin: EP1475338A1] The upper stringers of spaced apart conveyor belts (12) circulating in the same direction as the sheets together form a support surface for the sheets. A knife folder (10) folds the incoming sheet. Downstream from the knife folder is an end-stop (16). At least one holding down appliance (18) extends on each side of the knife and has bristles (20) on the underside extending the whole length of the height-adjustable holding down appliance.
