Abstract (en)  
[origin: FR2836020A1] Garment (10) has opening (26) with sliding clasp fastener. The opening has straight main section (28) in middle of front or back, lying either vertically or at oblique angle, and curved end section (30) extending towards one side and ending at neck (20). In variant of design, straight section of the opening can be at top and curved section adjacent to one hip. The sliding clasp fastener has cord attached to it for easier access. Garment (10), especially a dry or wet suit, has an opening (26) with a sliding clasp fastener. The opening has a straight main section (28) in the middle of the front or back, lying either vertically or at an oblique angle, and a curved end section (30) extending towards one side and ending at the neck (20). In a variant of the design the straight section of the opening can be at the top and the curved section adjacent to one hip. The sliding clasp fastener has a cord attached to it for easier access.
