Abstract (en)

[origin: WO03070312A1] The present invention relates to an aerosol injection and spout for massages and a container including the same. In more detail, the present invention relates to a container including an aerosol injection and spout for massages that are applied to head skin by directly injecting the aerosol including effective elements and has massage effects by tapping head skin with the spout. The container of the present invention comprises a number of soft projecting parts, a medicine passage connecting to a valve of the container including aerosol with effective elements, and at least one orifice connecting to the medicine passage.
