Abstract (en)

[origin: WO03065277A1] The invention regards a method of creating a transaction related record and includes communicating (26) selection data to a remote user terminal (24) wherein the selection data provides a user with an option to select payment for the transaction from one of a credit card (30), a telephone, and a bank account (32). The method monitors which particular account type the user selects and receives account data associated with the particular account. Thereafter, account data and an account type identifiers that identifies the account type selected by the user is included in a transaction record (28). The transaction record is then communicating to transaction processing equipment. The invention extends to transaction processing system and to merchant network equipment (2) and transaction processing equipment.
