Abstract (en)
The clasp has male and female parts (10,20) with connection units (11,21) at an end associated with a lace (2). The female part has a cavity (25) extending opposite to the connection unit for receiving a mandrel (15) of the male part. The cavity has a lug (26) intended to cooperate with a groove (16) of the mandrel for locking the male part in the female part. An independent claim is also included for a lace end connecting system comprising the clasp.

Abstract (fr)
