Abstract (en)
[origin: EP1477624A1] The adjusting foot (10) for the support of a profiled bar (12) on a base surface has a first baseplate (14), a first fastening plate (16) extending at right angles to the baseplate, and a first adjusting device (18) to adjust the inclination of the profiled bar. The adjusting device has a first adjustment plate (20) which extends at right angles to the first fastening plate in the longitudinal direction, and the inclination of which is adjustable in relation to the first baseplate.
