Abstract (en)
[origin: EP1477753A1] A built-in storage device having a main body (101) accommodated in a cabinet (200), the main body (101) having a storage compartment and a door (105) opening and closing the storage compartment, the built-in storage device also having: a cover part (110) disposed on an exterior of the door (105); a cover bracket (111) combined to the cover part (110); a door bracket (120) having a first door bracket (121) combined to the door (105) and a second door bracket (123) extended from the first door bracket (121) and combined to the cover bracket (111); and a first combining unit combining the cover bracket (111) and the second door bracket (123), to control a distance between the cover bracket (111) and the door bracket (120). With this configuration, the present invention provides a built-in storage device which can control the distance between the door and the cover part to open and close a storage compartment of a main body. <IMAGE>
