Abstract (en)

[origin: WO03066424A1] The invention relates to a method and arrangement for loading coils 1 and shipping them on board a ship 2. In the method, coil holders 4 comprising members preventing coil movement are used, the members being configured to hold a coil 1 placed to the coil holder 4 substantially in position at least in a horizontal and downward direction. According to the method the coils 1 are placed to the coil holders 4 and the coil holders 4 are arranged to a cargo space 3 of the ship. The method employs coil holders 4 arranged to a frame structure 5 dimensioned and shaped to extend substantially from a first sidewall 13 of the cargo space 3 to a second, opposite sidewall 14, the frame structure 5 being placed on the tank top 6 in the cargo space. The invention also relates to a coil holder arrangement.
