Abstract (en)
[origin: WO03070601A1] The invention relates to a container, especially for cigarettes, with a base (1) which comprises a bottom area (11) and a first wall (12, 13), and a lid (2) which comprises a cover area (21) and a second wall (22, 23). The base (1) and the lid (2) are hinged to each other on a first side (12) of the first wall (12, 13) and a first side (22) of the second wall (22, 23). In the closed state of the container, a gap is formed between the other sides (13) of the first wall (12, 13) and the other sides (23) of the second wall (22, 23). Around the base (1) and the lid (2) a protective cover (3) is disposed in the closed state of the container. Said protective cover (3), in the area of the gap, is provided with a perforated section (31) and is at least partially linked with the base (1) and/or the lid (2), especially glued to it or linked with it in a similar manner.
