Abstract (en)

[origin: WO03073133A1] The invention relates to a measuring appliance, especially a hand-held locating appliance for detecting inclusions in walls, ceilings and/or floors. Said measuring appliance comprises at least one sensor device (132), means for generating a detection signal for said sensor device, a control and evaluation unit (136, 140) for determining measuring values from the detection signal, switching means (32, 36, 38, 40) for operating the appliance, and an output device (12, 144) for the determined measuring results. According to the invention, operating instructions and/or a context-sensitive user guide for the measuring appliance can be displayed by the output device (12, 144) of the measuring appliance.
