Abstract (en)
[origin: WO03071880A2] The components, such as dies and moulds, incorporate an identification system - of the TAG memory device, transponder, BALLUFF type or the like - in a position fit for easy interfacing with the reading and writing system of each machine; operators are equipped with portable reading units for interfacing with said systems; and at least one control unit is provided for managing and updating the variable data during machining processes.
