Abstract (en)
[origin: WO03073344A2] An analytics delivery platform for providing a user interface, dynamic device support, and seamless multi-modal navigation for any number of devices. The dynamic device support is capable of efficiently supporting analysis of content on a plurality of devices. The multi-modal navigation provides users with the ability to analyze content on one device and then seamlessly switch to analyzing the same content on a second device. All the while the user interface is replicated across the various devices, in accordance with the characteristics of the particular device.
