Abstract (en)
A bed rest with high flexibility includes an articulated structure comprising a perimetric outer frame (10) and an inner articulated frame (30), wherein a plurality of slats (21) are inserted in respective slat holders (20), which are housed inside the outer frame (10). Said slat holders (20) are also realised so as to be positioned above the outer frame (10) and they are connected through joining elements (251) to the outer part of the inner articulated frame (30). <IMAGE>
