Abstract (en)

The object of the present invention is to find utility of a combination of bunazosin, having a new action mechanism, and prostaglandins as a therapeutic agent of glaucoma. The invention relates to a therapeutic agent of glaucoma, comprising bunazosin or a salt thereof and prostaglandins in combination, where bunazosin or a salt thereof and prostaglandins mutually supplement and/or enhance each action, and where bunazosin and prostaglandin may be formulated in a single preparation to be administered or may be separately administered in combination.
