Abstract (en)  
[origin: EP1479848A1] The soffit connecting profile (1) for components such as window or door frames adjoining plaster has a sealing member (2) with a sealing strip (3) on the component side and connected to an outer member (4). The outer member is connected to the sealing member by a flexible strap (5) or a foldable element. The outer member has a cover strip (6) projecting in the direction of the component and covering the gap (7) between the sealing member and outer member and similarly the sealing member's narrow side (8) facing away from the soffit.
