Abstract (en)
[origin: DE10313598A1] Cooking oven has an electronic controller (2) for controlling the heating arrangement (4, 6) and a display (8) that is designed to display variable information using pixel graphics technology. The display has an additional 7 segment technical component for display of variable numbers and a symbol illumination part for display of user-defined invariable symbols, whereby each technical part is suitable for the optical display of other information.
