Abstract (en)
[origin: EP1480173A1] The pack consists of a semi-cylindrical cradle (2) with alternating sections having parallel lengthwise axes that are offset vertically to make for easier counting of contents. The cradle has two folding side wings (4), each with a cover (6) in the shape of a segment of a cylinder made to overlap one another to close the pack. The underside of the cradle has a flat ridge (16) to stand it on.
