Abstract (en)

[origin: US2005087307A1] A method and apparatus for applying individual flat material segment to be separated from a flat material web to products. The products are moved continuously past the application device. The device includes a separation unit for separating the flat material segment from the flat material web. The device also includes an application unit for applying the flat material segment to the product, and a buffer unit between the separation unit and the application unit for the intermediate storage of the flat material segment so as to decouple the feeds at the separation unit and the application unit.
