Abstract (en)

[origin: WO03074373A1] The invention concerns a package (1) comprising a pressure-deformable container (2) and a head (3) adapted to be ruptured for dispensing the product contained therein. The invention is characterized in the dispensing head includes a neck (4) integral with the container (2) and delimiting an orifice, and a nozzle (5) secured to the neck (4), the nozzle (5) and the neck (4) comprising each a support surface radially oriented relative to the orifice and designed to be contacted with each other for being secured. The invention also concerns a method for making such a package.
