Abstract (en)
[origin: WO03074402A1] The invention relates to a cutting device for the transverse cutting of at least one material web (03, 04), comprising a transport cylinder (11), arranged such as to form a first cutting gap (08) with a first transverse cutting device (11, 12). The transport cylinder (11) is also arranged with a second transverse cutting device (11, 13) to form a second cutting gap (09).
