Abstract (en)

[origin: WO2004013249A1] A formable, porous chemiluminescent reactant composition, device (11) therefore, and a process for production thereof is disclosed. The fluidizable solid admixture (12) of the instant invention may be cured to a more or less rigid form with or without the use of a mold. The cured solid is useful as a chemiluminescent reactant component and is useful in a variety of environments.
