Abstract (en)

[origin: WO03071209A1] The invention relates to an open-door sensor for a refrigeration device comprising a magnetically operated switch (1) and a housing (3) that surrounds the switch (1). Plug-in contacts (7) for the switch (1) are accessible from one side of the housing (3). The housing is equipped with detachable fixing elements (25) for fixing said housing in a cavity (30).
