Abstract (en)

[origin: WO03075620A1] The invention concerns a plasma generating system comprising a high voltage generator (20) connected to at least two electrodes (26, 28) one of which comprises a high radius of curvature, or has a planar geometrical shape, and another comprises a low radius of curvature, said high voltage generator being controlled (32, 34, 36) so as to maintain constant the average frequency of current discharge occurrence between the electrodes.
