Abstract (en)

[origin: EP1481713A1] The platform has a fixation unit mounted on a plate. The plate has two hooks reversibly cooperating with openings (23, 24) on front and back plates (9, 11) for positioning the plate and fixation unit at different predetermined longitudinal levels. The front and back plates are mounted on recesses (14) that are present on an upper surface of the platform, such that the hooks are placed in the recesses.
