Abstract (en)

[origin: EP1482112A2] An emergency unlocking device (10) has a first pulling element (PE) (14) that does not rely on an electrical unlocking device (EUD) to trigger a movable rotary catch (MRC) (12) into a release position, in which a closing element fastened on a bodywork part to be opened is released. The EUD has an electrical adjusting element to act on a lock (8) via a second PE (17) and release the MRC.
