Abstract (en)
The column has a cover plate (3) fixed in the column with respect to vertical longitudinal edges of an exterior envelope (1a). An engine block (8) is placed on a horizontal support plate (6) for driving opening and closing movements of a door. The block is connected with a control cabinet (17) mounted on a vertical support plate. A lamp (5) is mounted on a support structure integrated in the cover plate. The vertical support plate has two projected parts engaged with two horizontal rails.
