Abstract (en)

[origin: EP1482600A1] The device has a connector (26) for securing a cable in electrical communication with an electrical output (34). The connector is rotatable between two positions such that a cable is secured to the connector in any one of the two positions. The two positions are spaced at approximately ninety degrees to each other which represents minimum bend radius of the cable. The connector is press fitted into a body.
