Abstract (en)

[origin: WO2004017772A2] The CO-Neutralizer Card consists of two basic parts: Permanent magnetic base (B) and metal disc (A). The metal disc is made of 80:20 alloy of copper and zinc crystals and contains a galvanized engraving. With its wave energy the disc is acting on tobacco thus changing its burning pattern, which results in a reduced CO and increased CO₂ production
