Abstract (en)

[origin: WO03075708A1] The invention relates to a peeling strip for application to an area of skin covered in a layer of epilation wax, said strip comprising a support of flexible material. According to the invention, said support contains a phase-change material with a transition temperature below that for application of the epilation wax to the skin, or said phase-change material undergoes an increase in calorific content on contact with the layer of wax.
