Abstract (en)

[origin: WO03076301A2] The invention relates to a packing unit for a single or multi-component end product, made from a plurality of separate partial packages (1, 2). A second partial packaging (2) with at least one other product component can be fixed to a first partial packaging (1) with at least one production component. According to the invention, the second partial packaging (2) is fixed to the first partial packaging (1) in a ready-to-use state and the second partial packaging (2) at least partially covers an opening (4) of the first packaging (1) with the output side thereof (3) for the at least one other product component.
