Abstract (en)

[origin: WO03077196A1] In a method, a device system and a computer program for producing and tracing a printed document (37) with a determinate identifier, a data carrier (44) having an individual recognition characteristic is applied to a recording medium (5, 27), which can at least be partially electronically read in a contact-free manner, can be erased, altered and/or can be written on. Said recording medium (5, 27) is printed with information and whilst the documents are being produced data is written on the data carrier (44), wherein data from a user program, the printed documents and/or the data carrier (44) are combined in a file.
