Abstract (en)
[origin: WO03081540A1] The invention concerns a game which consists in drawing a universal sequence {ek} of p characters among a set (En) of n characters {ek}. The players enter personal sequences of p separate characters {Sk} which are collected and stored and p successive elementary draws are performed, each of a first and of a single character ek, among respectively p sets each consisting of n characters except those drawn in all the previous elementary draws ek. The system comprises means for entering, collecting and storing sequences of characters (18, 20) and participating in the game (19), connected to a control operational center (100). Means are also provided for controlling elimination (105, 15) of characters.
