Abstract (en)

[origin: WO03077550A1] This invention relates to a system and method for transferring messages from a message communication unit such as a phone, a cellular or mobile phone, a personal computer, a digital camera, or a digital video camera to other compatible systems such as digital set-top boxes (STB), multimedia terminals, digital TV receivers or digital TVs. The system communicates a message between a message communication unit and a television device, by utilising a base station in a wireless communications network, a communications provider connecting to the base station, a television network operator operating a television distribution network, and a television device.
