Abstract (en)
Concealable gripping device comprising a container body (10) able to be inserted in the thickness of a wall, a sliding element (20) which is coaxial with the container body (10), provided with a head-piece (22) and able to move from a first position with the head-piece (22) outside said container (10) into a second position with the head-piece inside said container body (10) and vice versa, and coaxial resilient means (15) exerting a thrust on said sliding element relative to the said body (10), said container body (10) having at least one longitudinal guide (43) suitable for engagement with a body (30) shaped in the manner of a butterfly (33), radially projecting from said sliding element (20) and free to rotate about a radial axis of the sliding element (20), one end of said guide (43) being provided with means (43a) able to cause rotation of said butterfly (44) and means (43c) able to interfere with its travel along said guide (43) so as to cause stoppage thereof. <IMAGE>
