Abstract (en)

[origin: EP1484044A2] Device for feeding steam from a steam generator into a steam chamber comprises a housing (11) with steam outlet openings (22), and a steam supply line (16) opening into the housing. An outlet (18) of a discharge line (19) of the steam generator opens into the housing and a drain (25) is provided for emptying the housing. Independent claims are also included for alternative devices. Preferred Features: The drain has a line that leads from or out of the steam chamber. The line preferably leads to a waste water line or a siphon of the steam chamber.
