Abstract (en)

The assembly has a pushbutton (4) with a hole (16) for receiving a control rod (14) and a nozzle (18) extending in a distribution direction perpendicular to a longitudinal direction of a pump (2). A cap (6) has a cavity in which the pushbutton is maintained, and a passage (24) extends itself in an assembling direction perpendicular to the longitudinal and distribution directions. An independent claim is also included for a method of forming a fluid distribution assembly.
