Abstract (en)  
An inner part (1) made of a dimensionally stable plastic material forms a holder for a lamp to be packaged. The holder shape is matched to that of the lamp (2) to ensure a positive hold on the latter. Positive holding of the lamp (2) is effective around not less than 50% of its outer surface. The holder has an opening of restricted dimensions compared to the lamp, to aid removal of the latter from the inner part (1). The complete packaging comprises a rectangular folding box in which the inner is positioned diagonally inside it. An independent claim is included for a process for packaging a lamp in which the lamp is used to form the holding recess.

Abstract (de)  
Die Erfindung betrifft eine Verpackung für eine Lampe (2) mit einem Innenteil (1), das eine formschlüssig an die Außenkontur der Lampe (2) angepasste Aufnahme (11) für die Lampe (2) besitzt, so dass durch die formschlüssige Gestaltung der Aufnahme (11) eine Verankerung der Lampe (2) in der Aufnahme (11) bewirkt wird. <IMAGE>
