Abstract (en)
[origin: EP1484447A2] Bearing for mounting special track constructions such as points, rail-extraction devices and cross frogs comprises a frame (4) that is open at the top and surrounds the points body (2K) or cross frog body. Intermediate layers (5) made of rubber or a rubber-elastic plastic are arranged between the points/cross frog body and the side surfaces of the frame. A free space (7) is provided between the lower limiting surface (6) of the points/cross frog body and the lower surface of the frame. Preferred Features: A screw (8) passes through the frame and the points/cross frog body.
