Abstract (en)

[origin: EP1484918A1] Each of setting items in print setting when image data held in a digital camera is printed by a printer is provided with an option of "Depend on printer setting". When print setting data received by the printer contains a setting item of "Depend on printer setting", concerning this setting item, the printer prints the image data based on the designation set in and registered with this printer at this point in time. Consequently, it is possible to increase user-friendliness regarding print setting at the time of printing of the image data in the digital camera, and increase the efficiency of product design work of digital camera manufacturers. <IMAGE>
