Abstract (en)

[origin: WO03076244A1] The invention relates to a method and a device for controlling a vehicle brake system with active hydraulic brake force reinforcement. According to the method an active pressure reinforcing unit and/or a pressure modulation unit is controlled by means of a comparison of a set pressure, or a set vehicle speed or parameters derived therefrom in particular a set vehicle acceleration with an actual pressure, or an actual vehicle speed, or parameters derived therefrom, in particular an actual vehicle acceleration.
