Abstract (en)
[origin: WO03080460A1] A stackable, heat processable, blow molded, plastic container (10) is disclosed. The container (10) has a body (1) that has top and bottom ends and a tubular sidewall (12). The container also has a dome (13) with a finish (14) having an opening. The dome (13) is connected to the top end of the body and the finish is adapted to engage a first closure. Finally, the container has a base connected to the bottom end of the body. The base is contoured to engage at least a portion of a protrusion on a second closure, thus causing the two containers to be stackable.
