Abstract (en)
[origin: WO03074821A1] Spot footing designed especially for securing a precast concrete or timber column to a foundation and/or for extending such a column, said spot footing comprising a base plate (3) provided with a mounting hole (7), and a substantially cylindrical, rigid protective casing consisting of a top plate (2) and a side wall part (4, 6) having an opening (5), an anchor bar being secured to said top plate (2). The spot footing comprises two or more anchor bars (1) secured to the top plate (2) and specifically so disposed in the top plate that the anchor bars are located substantially around the hole (7) of the base plate (3).
