Abstract (en)

[origin: WO03072919A1] A combustor for a combustion system is described. The combustor includes an inlet region for receiving a compressor discharge air, and a pilot assembly (110) and main swirler-injector assembly (116) therein. The pilot assembly may include a pilot inlet region (112) for receiving at least a portion of the air, a catalyst (113) located downstream of the pilot region, a pilot fuel injector (111) for delivering pilot fuel upstream of the catalyst, and a pilot outlet region located downstream of the catalyst. The main swirler-injector assembly may include a main swirler-injector assembly inlet region and a main swirler-injector assembly fuel injector located downstream of the main swirler-injector assembly inlet region.
